

TITLE

**INFLATABLE PRODUCT PROVIDED WITH BUILT-IN BATTERY CASE AND
SOCKET**

5

ABSTRACT OF THE DISCLOSURE

An inflatable product includes an inflatable body, a
socket, an electric pump, at least one battery and a
connector. The socket is built in the inflatable body. The
electric pump is connected to the socket to pump the
10 inflatable body. The battery is disposed in the electric
pump. The connector is provided on the electric pump for
connecting an external power. The electric pump is supplied
with power by the battery or the external power.
